

Automatic Inkjet Coding Machine with Conveyor

This is an "ANSAR" make INKJET Coding Machine model PRO S for printing on porous & non-porous surfaces like PET, metal, plastic, wood & paper. It can be used for printing on bottles, caps, labels, boxes, bags etc. It has the following unique features -

- Cartridge is suitable for 2.5 lakhs to 2.75 lakhs prints of three lines each which makes it extremely cost effective.
- Display of the printer of 3.5 inch LCD screen with LED back light
- User interface has a simple and easy to use operating system
- Input device is a pocket sized IR remote key pad
- Available languages are Chinese, English, German, Spanish etc,
- Size of the of the printer is 119 mm x 78.8 mm x 76.0 mm
- Weight is 550 gms
- Mounting orientation can be horizontal or vertical
- Operating temperature is 5 degrees Celsius to 50 degrees Celsius
- Data interface is RS485, USB port
- Can be integrated with FFS machines, band sealers, taping machines and other packing machines for printing on labels, bags and pouches.
- The most significant advantage of the U2-ProS and TIJ printers in general is that they are virtually zero maintenance devices. Once a cartridge is exhausted, it merely has to be replaced with a new piece. There is no ink reservoir, make-up or complicated parts that need regular replacement like most large character or CIJ printers.
