Labeling Machine -
for PET / Glass Bottles

This is a compact table top self adhesive labeling machine for round PET and Glass Bottles. It can also be used for labeling round Cans / Tins. Ideal for small scale industries for quick & neat labeling. It is a simple machine to use.

The labels in roll form are loaded into the machine in the slot provided for this. One bottle is kept on the bottle table horizontally. When the handle is turned once, one bottle gets labeled. The machine can be used for bottles with different diameters and lengths.

The machine is made of powder coated mild steel and is sturdily built. It requires minimal maintenance.. About 10-12 labels can be applied per minute depending on the operator's speed.
