

Drum Cap Sealing Machine Hand Operated

These drum capping tools are used extensively to cap 200 liter (50 gallon) drums that are utilized to store and transport chemicals, pharmaceutical raw materials and commodities like crude oil.

The drum capping tool is meant for caps of two diameters – 3/4" and 2". Depending on operator speed this tool can secure anywhere between 240-360 caps per hour. The body is made out of mild steel with nickel-chrome plating and the jaws are made of heat treated mild steel.

The sealers are easy to use and require very less maintenance.
