

Potato Peeling Machine

The Potato Peeler is a simple machine and easy to use.

The chamber of the machine, its lid and its revolving base are emery coated. The top cover of the peeling chamber is opened and about 2 kg of potatoes are poured in. The potatoes rub on the walls and are peeled. The peeled potatoes are removed from this chamber via the side door. The chamber has a nozzle fitted on the top lid to which a water connection is made to wash down the peeled skin from inside the chamber.

The machine is powered by a ½ Hp 1 ph Motor. The machine is robust and can be used continuously for 8 hours. About 500 – 600 kgs of potatoes can be peeled in 8 hours
