

Rinser with 12 / 24 Cups with Pump & Tray for Glass Bottles

- The Motorized Rinser is ideal for high-speed jet rinsing of PET / Glass bottles.
- The pump must be used in case overhead tank is not available.
- The Rinser is mounted on a portable SS table with a water collection tray.
- A monoblock pump is provided to jet the water into the bottles.
- Water connection is made to the inlet of the pump.
- The outlet of the pump is connected to the three way ball valve of the Rinser.
- The bottles are kept upside down in the rubber cups.
- Ball valve is opened and the bottles are rinsed.
- The rinsing water falls back into the collection tray and can be reused after filtration or drained.
- Once the rinsing is over, the three way ball valve can be closed to load the next lot.
- Meanwhile the pump is on and the pumped water is recycled back through the third port of the ball valve.
- About 24 / 48 bottles can be washed per minute depending on the speed of the operator.
