

Soda / Soft Drink Filler **for - PET Bottles Manually Operated** **Single Head (Direct Filler)**

- This table-mounted unit is an additional filler used for filling soda /soft drinks in PET bottles.
- This machine must be connected to a Carbonator.
- PET bottles of size 200 ml to 2000 ml can be filled.
- No mounting adjustments are required.
- The bottle is placed on the bottle holding plate and the bottom lever pressed.
- When the filling valve lever is pressed, soda starts flowing into the bottle. When the bottle is full, the filling lever is released. The bottom lever is also released and the bottle can be taken off.
- To make soft drinks, the bottles are pre-filled with required amount of syrup concentrate. Then soda is filled on the machine the soda and syrup mix inside the bottle to make soft drink.
- A 'Snift' Valve is fitted to release the air inside the bottles during filling.
- The machine requires very little maintenance except for washers and springs that generally wear out.
