

Tablet Making Machine - Motorised

The Tablet making machine is suitable for making various types of Ayurvedic, Medicinal, Camphor, Ink, Sandal, Serpent Fire Crackers, Air Freshener, Naphthalene and other similar tablets.

This is a fully automatic machine powered by a 1 Hp motor. Its unique sturdy design is based on the eccentric press principal and needs practically no maintenance. The stroke of the machine can be adjusted such that maximum compaction pressure can be achieved.

The machine is compact, requires minimum space and is highly productive. The capacity of the machine is 90 strokes per minute and accordingly the production of tablets can be calculated based on the number of cavities in the die. The Die, Punch, Ejection Pin & the Feeder have to be changed according to the tablet size and number of cavities.

The operation of the machine is very simple and needs no skilled labor. The powder is fed into the hopper from where it enters the die cavity through a chute. When the machine is switched on, a feeder arm pushes the powder into the die and simultaneously pushes out the finished tablets from the previous stroke.

All the contact parts can be provided in stainless steel as optional.

Dimensions: 450mm (W) x 750mm (D) x 850mm (H)

Weight: 200kgs. Approx.

Tablet Size: Minimum - 6mm Dia x 5mm Thick
Maximum - 20mm Dia x 8mm Thick
