

Soda / Soft Drink Machines For PET Bottles

Syrup / Liquid Filling Machine

This is a simple liquid filling machine. All liquids which have density almost similar to water can be filled. Any quantity from 5 ml to 1 liter can be filled. The machine is provided with two timers on its front panel – one timer sets the fill quantity per bottle and the other timer is to set the cycle time – that is the time between each fill.

The machine is made out of SS 304 and is a table top model. It has two hoses – one for the liquid suction which can be dipped into the container holding the liquid and the other can be held in hand for filling in each bottle. The fill and cycle times can be easily set.

The machine is robustly built and is portable. It requires very little maintenance except the cleaning by pumping water through the hoses for a few minutes after the filling is over. The machine is warranted for a period of one year.

Showroom & Demo Center

2 & 3, Rajagopal Layout, Avarampalayam Road,
Peelamedu, Coimbatore - 641 004. Tamil Nadu, India.
