

Aerosol Can Crimping Machine Hand Operated

- This machine is used for crimping Aerosol Cans.
- It is a simple machine to use.
- The cap to be crimped with the valve is placed on the mouth of the filled Can.
- The height adjustment is made according to the height of the Can.
- The handle is then pressed.
- The Crimping Collet opens and crimps the cap.
- The Can is removed from the machine.
- Any Can may be crimped. The Collet is suitable for 25 mm cap.
- An average production of about 6 Cans per minute can be achieved. However, this depends on the dexterity of the operator.
- The Machine can be supplied pneumatically operated also.
