

## Can Seaming Machine - Motorised

The machine is designed for double seaming of Can lids. It is powered by a 1 Hp III ph motor and can seam about 600 Cans per hour depending on the dexterity of the operator. It is easy to operate:

- Person presses the hand lever in front of the machine down and places the Can with lid on the Can table.
- The hand lever is then pressed up and the lid goes into the Chuck.
- The Can with lid is rotated with the chuck and Can table, and the double seaming rollers seam the lid on the Can.
- The front lever is again pressed down and the Can removed.

It is mounted on a solid MS frame and all its parts are designed and manufactured for a long working life. It requires very little maintenance and can be used for 8-10 hours daily. The machine is available with most sizes of standard Flanging Dies.
