

Crown Capping Machine - Hand Operated Table Top Model for Glass Bottle

This is a handy table top machine for crown corking glass bottles. It can be installed on a table and is easy to use.

A glass bottle is placed on the bottle table. The height of the crowning Die is adjusted to suit the bottle height. A crown is placed below the Die. It is held on by a magnet. The handle on the front is pressed downwards and the bottle is crowned.

The machine is robust and can crown about 7-8 bottles per minute depending on operator speed.
