

Hand Operated Batch Coding Machine - Manual

The Hand Operated Batch Coder is a handy machine for printing batch number, MRP, date of mfg etc as required. It can print three or four lines. The unit is available for printing on various surfaces like plastic, metal, wood, paper, ceramic and glass – on bottles, lids, caps, jars, labels, laminated cartons, tins, cups etc. It can print on flat and curved surfaces. For each application a model is available.

A complete set of alphabets, numbers and symbols are provided. These are available in sizes from 2 mm to 10 mm depending on whether they are metallic or rubber. A bottle of special fast drying ink is supplied with the coder.

The machine is also supplied with a wooden base for printing on soda/soft drink glass bottles. It is also available pneumatically operated. The machine can be fitted on automatic Form Fill Seal Packing machines for printing on pouches as they are formed, filled and packed.
