

## Lug Cap Sealing Machine - Pneumatically Operated

This is pneumatically operated machine used for capping glass bottles of Pickles, Jam, Sauces, Juices etc. Bottles with various mouth sizes & heights can be sealed.

The method of operation is simple. Filled bottles with cap on top is placed on the bottle table. Pneumatic foot switch or hand lever is pressed. The capping head presses on the cap. Capping handle is turned 45 degrees for capping. A production of about 5-6 bottles per minute can be achieved depending on the dexterity of the operator.

An air compressor is required. A hand operated model is also available.

### The salient features of the machine are:

- Convenience of usage
- Minimum maintenance.
- Good quality pneumatic spares used for longer life.
- Capping Die is stainless steel.
- Easy availability of spare parts and therefore lesser downtime.
- Is light weight and easy for transportation
