

Lug Cap Sealing Machine - Manually Operated

This is a light weight easy to use manually operated machine used for capping bottles of Pickles, Jam, Sauces, Juices etc. Bottles with various mouth sizes & heights can be sealed.

The method of operation is simple. Filled bottles with cap on top is placed on the bottle table. The top hand lever is pressed. Capping handle is turned 45 degrees for capping.

A production of about 5-6 bottles per minute can be achieved depending on the dexterity of the operator.

The salient features of the machine are:

- Convenience of usage
- Minimum maintenance.
- The Capping Die is Stainless steel.
- It is light weight and easy for transportation
