

## Pilfer Proof Capping Machine Motorised

This is a versatile ROPP Cap Sealer, sealer which can be used for sealing and threading metal cap on PET and glass bottles. Bottles of various heights, shapes, sizes and mouth diameters can be capped. It has a ½ HP motor which rotates the Die. It is easy to install and use.

Press the foot pedal and place one bottle on the bottle table. When the foot pedal is released the bottle gets locked between the bottle table and capping die and it automatically threads and seals the cap. Press foot pedal once gain to remove the bottle. About 180-200 bottles can be capped per hour depending on the speed of the operator.

The machine has an MS stand and is sturdily built. Dies of various sizes are provided so caps of different diameters can be sealed. A height adjustment rod is provided to suit bottles of different heights. The machine requires very little maintenance.
