

Potato Chips Cutting Machine

The Cutting machine is simple and easy to operate. It is portable and can be installed on a table. It has a ½ Hp 1 ph motor.

Peeled potatoes are fed in through a pipe on the top of the machine. Plain Chips, finger chips or serrated chips come out the machine according to the blade used. The sliced pieces are ejected out of the chute. The chips are of even thickness.

The blades can be changed easily as required. An extra set of special blades are also available for cutting cubes of various sizes.

The machine can be quickly cleaned by opening the top lid. It is sturdy and robust and its cutting blade is made of SS 304 for a long life. It can also be used for vegetables like onions, carrots, radish etc.
