

Powder Mixing Machine

- This machine is meant for mixing various powders used in the medical, food, Soap, chemical industries etc.,
- The machine is sturdily built and consists of a stainless steel vessel, which holds the powders. The size of the vessel varies according to the quantity to be mixed per batch. The vessel is mounted on a rigid MS stand.
- A fan rotates inside the vessel. The fan is suited to the various mixing needs of different powders.
- The fan rotates on the central shaft, which is coupled to a gearbox and motor.
- The rotating speed of the fan is preset but can be given as per the density, type and quantity of powder.
- The vessel can be tilted, so that after mixing, the mixture can be removed easily.

➤ **The motor size, gear box, fan dimensions and machine specifications will vary and are subject to the following factors:**

- The type of powder to be mixed.
 - The quantity to be mixed per batch.
 - The density and consistency of the powders to be mixed.
- The machine can be supplied in full stainless steel model also.
- The machine can be designed and supplied to suit specific applications.
