

Semi Automatic Washing Machine with Brushing Unit & Rinser - for Glass Bottles

- This is a compact washing machine for glass bottles.
- It consists of a Brushing unit mounted on one side of the machine. The unit has four brushes. An extra set of mouth cleaning brushes are also provided.
- Two persons can stand and wash two bottles each on either side of the machine.
- After Brushing bottles are kept upside down on the adjoining rinser trays. These trays can hold 24 bottles each.
- Once the tray is full, it is manually pushed and it goes to the next position where the bottles are rinsed with high speed jets of water. For this a 1/2 HP I ph pump is provided. Two rinsers with two tanks and two pumps are provided.
- The machine can hold 7 trays in a row. The bottles are rinsed twice as they are pushed along the line.
- The rinsed water falls back into the tanks at the bottom and is recycled. The tanks can hold about 100 liters of water. They are provided with water inlet & outlet ball valves.
